Dear DZ Golf, I had the opportunity to try the NEW Red devil driver. I am a R11 Taylor Made guy and A Dimension Z iron player. Dimension Z
re shafted my Taylor Made R11 to fit my swing speed and until now I thought I was set with a good driver. When I had the opportunity to try the Red
Devil I thought, OK, how could this change my game. I already hit the ball over 300yds so distance wasn't a issue. Working with Brad in setting this
driver up for my game he stressed to me that i wouldn't lose any distance but I would be more accurate and hit more fairways. so when I took it to
the range I hit four balls with my R11 and four with the Red devil I continued this for around 40 balls I keep seeing more accurate shots with the Red
Devil but it was only the range. So for two rounds in competition play I played the red devil The first round I hit 6 out of 8 attempts the second
day ways the same this being 3 fairways better per round then my R11. I believe Brad has the right idea of a Great driver head put together with the
right Shaft for each individual player creating a long but very accurate driver. This giving more confidence to go low. A must for the serious
golfer. Thanks. Brian Stanley, 5 hdcp

Dear Dimension Z:

I am writing this letter of recognition regarding Mr. Don Ingermann's customer service. Although I have known Don for a very brief period, I can attest to his professionalism and resolute to provide solid customer service, as he resolved my golf club concerns. He far exceeds expectations to ensure that Dimension Z customers are treated with respect, and works hard to successfully resolve matters as fast as possible. Accordingly, I am writing this because it is my belief that he is qualified for Outstanding Customer Service recognition.

He has demonstrated that he is a good communicator and professional. In my opinion, he is a fine example of customer relations and care. He is dedicated, and one who knows how to work with customers to happily strive for the best possible solutions for the customer and Dimension Z.

In closing, I readily recommend Don for the status of Outstanding Customer Service recognition.

Sincerely,
John D. Wright, Colonel, USAF (Ret)
Parker, Colorado

Hello Mr. Ingermann, Just a brief note of thanks for the lob wedge you made for me, that I won from The Fan. About every 5 years or so, growing up until his passing a few years back I got a new set of irons (used of course) from my grandfather growing up and older. Loyal Ping player... very loyal. Their lob wedge was one of the most demonized clubs in my bag, I dreaded hitting it because of the inconsistency due to the extra weight in the front of the club and the odd shape of the bottom of the club. That being said, after a small bucket and target golfing on the range and an hour on the chipping green, I can hit your club dead red, with spin, one putt. My Dimension Z Lob Wedge is going to take at least 10 strokes off my round. Such a dynamic weapon from 50 yards in. Love the grip and the feel. Great shot making club! Thank you Mr. Ingermann. Grew up on a course and at the age of 41, still get in a couple rounds a week, you make one swell golf club. Thank you sir! MB

Mattie Bicknell

I wanted you to know that I have received my new set of Dimension Z Golf Clubs. There are beautiful!

Well, I got to sneak out and play a few holes by myself yesterday. Always a great time. This time is was even better. I really like the Driver and Metals and I LOVE the irons. They have a really "solid" feel when I hit the ball and I like the way they look when I am standing over them. I really didn't know what to expect when I ordered the clubs, but I can honestly say in playing with them once, they are the best feeling, solid hitting, consistent clubs I have ever played. I was not sure I would even be able to tell the difference, but I really could. I even had to go back to my normal neutral grip, stance and swing to hit them well. (I had moved to closed grip and stance recently to get a little more distance.)

Thanks again…*Ron R (Phoenix, AZ)*

Take it from the guy who has played all the courses in Colorado- “You will not find a better built set of clubs than those that are built by Dimension Z”. My teaching pro fitted me for DZ clubs in 2002. Since that time, my game has not only improved over the years, but my confidence and skill level continues to improve. In 2006 I was fitted for another custom club brand, but within a year I went back to my DZ’s. At age 60, most of my peers are losing their game, mine is only getting better. ~*Dave Fanning (Colorado)*

It has been a month since I received the Widow Maker Z450 Driver. I am absolutely thrilled with the results. The 50gr, flexible shaft you installed from Aerotech & new the head designs exactly the answer for seniors, who have a slower swing speed. My driving distance has improved by 20 years of carry and the rollout is closer to 30+ years. My handicap has been lowered by 3 strokes. As you know, I recommend Dimension Z golf to all my friends.
~Dave Weiss (Golden, CO)
