PERSONAL MEMO – This is a personal memo to a passionate golfer from a passionate golfer. Ever wonder why tour players are so accurate? It's not only their polished game but the *finely tuned clubs* that help them shoot low scores. Their clubs are precision built and *finely tuned*. We build clubs for tour players and what you can buy today from the name brands is a far cry from the precision and tuning the tour player requires.

NOW for the first time, you can have clubs that are built with the same precision tuning and care. At Dimension Z Golf, we use our proprietary "Integrated Tuning Process" to lower your scores by taking the mass-produced irregularities out of every set. The proof is in the results. Dimension Z players average a six stroke reduction in the first season of play.

Having a perfectly matched, finely tuned set of clubs is like having a perfectly tuned guitar. It will play great music, but un-tuned it is awful. Only tour pros are aware of the importance of perfectly tuned clubs because they are the only ones who have seen and felt the difference.

NEW FITTERS – Common Ground Learning Center in Aurora, CO and Karl Gross in Royston, GA. Great teachers and fitters.

TRADE-IN BONANZA – 30% Trade-in allowance good through May 25, 2010. Dimension Z Golf has selected a limited number of golfers to receive this special offer.

PLAYER RESULTS – Robert DeLong reports lowering his golf scoring average from 110 to 81 in just two years. Precision tuned clubs by Dimension Z did make a difference. That is a 29 stroke reduction. WOW!

SALE – 830z 9.5º Drivers, originally $360 now only $180.
